ELF ON THE SHELF

SEE SOMETHING...SAY SOMETHING...

Every month we will focus on specific pests that plague residents here in the Northwest. This month we will focus on Elf on the Shelf. As you well know he comes around this time of year to be the eyes and ears of Santa Clause. He may not be in every household, but the ones he is in may have some mischief happening throughout the night.

This particular elf gets sent to homes that may need a little more information for Santa to put the children on the nice list. The scout elf will then take that information to the North Pole every night and report back to Santa what has happened that day. He then returns the house in the morning to keep monitoring the children.

To prevent Elf on a Shelf from being a problem in your home, make sure you are listening to your parents as well as doing your chores. This will limit the Elf on the Shelf from acting out during the night. Keeping a clean room and good grades, will help tremendously in making sure the Elf on the Shelf stays away, because you are already on the nice list.

MAINTENANCE CORNER

This month we wanted to focus on range hood filters. These can get gunked up with grease from being right above your stove. This makes it a dangerous item to have next to any flames as it will ignite very easily and quickly. Here are some tips to keeping them clean. If you need them replaced, please contact maintenance ASAP!!!
